Oral Health Integration Workflow Mapping Report

Use the framework below to draft your referral agreements with your dental partners. This is a comprehensive listing of issues that may arise in referral arrangements. Feel free to customize to your patients, organization, and dental partners. This will require communicating with your dental partner for the sections pertinent to their preferences and requirements. Change all instances of "Primary Care Medical Clinic" and "Dental Clinic" to the names of your clinic and dental partner organization. Delete this text box and contents once you have completed drafting the below content.

Practice Name

Address _____

Date _____

Participant Names _____

Current State Summary Drawing (insert below):

Future State Summary Drawing (insert below):

The future state incorporates the Oral Health Delivery Framework (Ask, Look, Decide, Act, Document) steps during the office visit workflow for target population the pilot has selected (e.g., patients with diabetes, pediatric patients, pregnant women, etc.) _____

1. Steps for the Framework and who will do them, if unclear from future state drawing. _____

Measures to evaluate the future state workflow:

1. _____

Task List

About the Oral Health Integration in Primary Care Project

Organized, Evidence-Based Care Supplement: Oral Health Integration joins the Safety Net Medical Home Initiative Implementation Guide Series.

The goal of the Oral Health Integration in Primary Care Project was to prepare primary care teams to address oral health and to improve referrals to dentistry through the development and testing of a framework and toolset. The project was administered by Qualis Health and built upon the learnings from 19 field-testing sites in Washington, Oregon, Kansas, Missouri, and Massachusetts, who received implementation support from their primary care association. Organized, Evidence-Based Care Supplement: Oral Health Integration built upon the Oral Health Delivery Framework published in Oral Health: An Essential Component of Primary Care, and was informed by the field-testing sites' work, experiences, and feedback. Field-testing sites in Kansas, Massachusetts, and Oregon also received technical assistance from their state's primary care association.

The Oral Health Integration in Primary Care Project was sponsored by the National Interprofessional Initiative on Oral Health, a consortium of funders and health professionals who share a vision that dental disease can be eradicated, and funded by the DentaQuest Foundation, the REACH Healthcare Foundation, and the Washington Dental Service Foundation.

The guide has been added to a series published by the Safety Net Medical Home Initiative, which was sponsored by The Commonwealth Fund, supported by local and regional foundations, and administered by Qualis Health in partnership with the MacColl Center for Health Care Innovation.
