Learning Community Planning Questions

- Site and Structure: How many sites will we serve and how will we aggregate ourselves into regional learning communities, or collaborate with existing communities?

- Buy-in: How will we encourage buy-in for application of the change package for PCMH and for NCQA recognition with three main target groups: the Community Health Center Board, CHC senior leaders, clinical and non-clinical staff?

- Leveraging existing experiences/resources: What prior experience is there within our community partners that we will develop and use?

- Leadership and Staffing: Who will direct the learning communities and what staff is available to organize and coordinate the activities? How will we engage practice coaches in the learning community? What local experts or physician champions are available to lead and provide faculty?

- Learning Modalities: How will we host learning sessions? In-person meetings? Virtual meetings and webinars?

- Infrastructure: How will the states in our region work together to support learning communities? How will we ensure communication systems are in place and work together to achieve this?
