Overdose-Related Services & Projects Summary by Oregon County

Updated February 2021

Document Overview

This document provides county-specific snapshots of overdose-related services and projects across Oregon. This information supports Oregon Health Authority (OHA) overdose-prevention funding decisions and county-level public health agencies' planning and intervention efforts.

Information in this document was updated February 2021 and will be updated every six months to reflect changes in Oregon counties. If you have any questions or edits to this document, please contact Chris Sorvari or Erin Stack.

Services & Projects Overview

Table 1 provides a brief overview of the 12 overdose-related services and projects included in this document, outlines the information provided in Table 2 summarizing the services and programs by county, and provides a link to additional information about each service and program within this document.

Table 1: Services & Projects Overview

Services and Projects Summary by County

The map visualizes summary counts of available services and projects in each county. To create the summary count, counties were assigned a 1 (service/project present) or a 0 (service/project not present) for each service or project. Table 2 provides additional summarized information about the services and projects in each county.

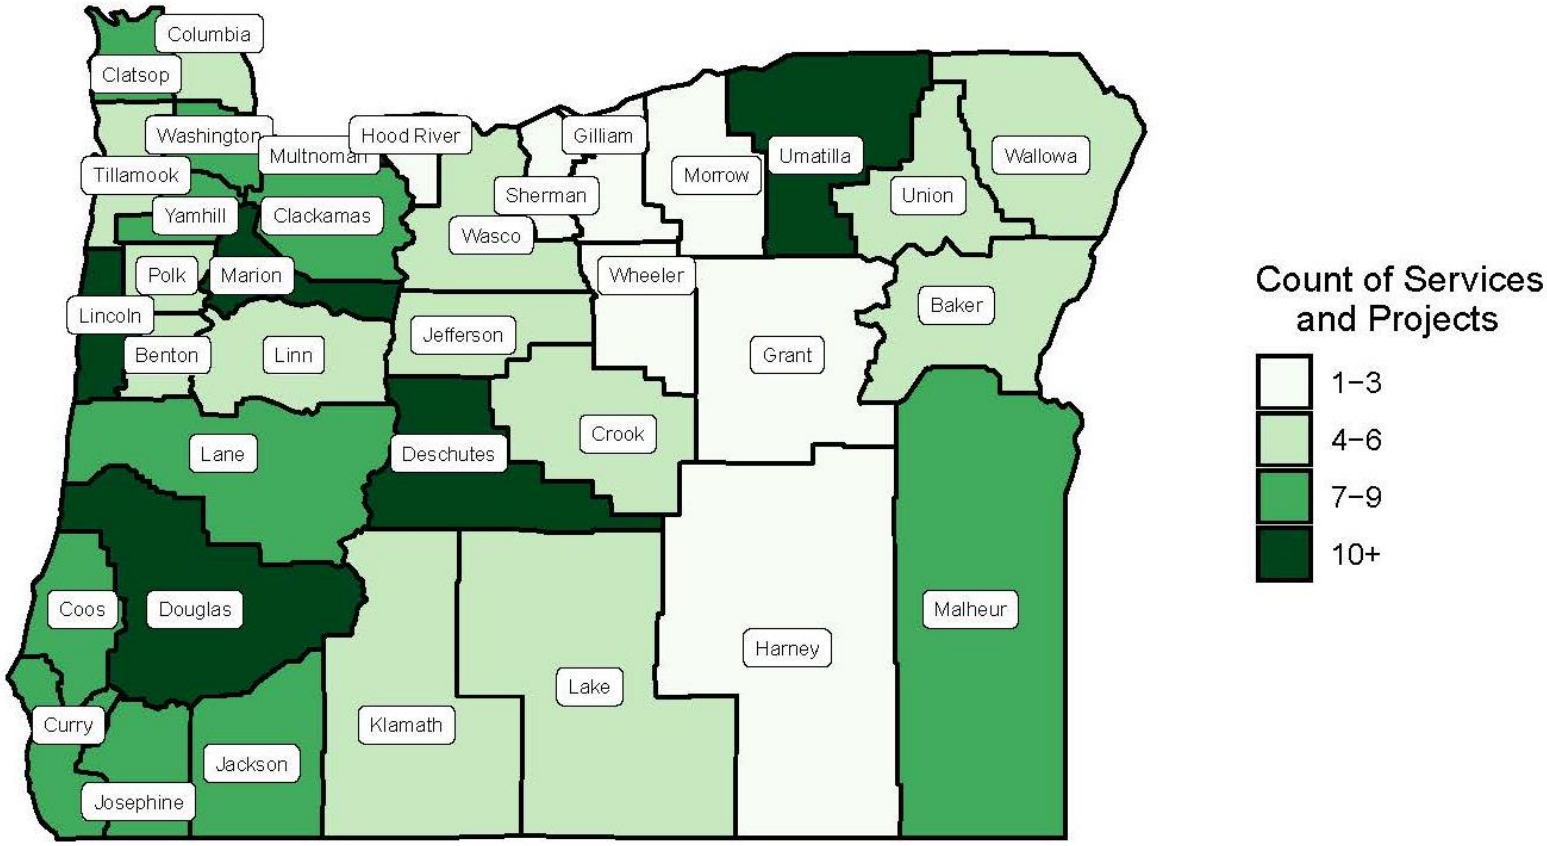

Table 2: Services and Projects Summary by County

[a] The Confederated Tribes of Grand Ronde are implementing the Heal Safely Campaign. The Grand Ronde community spans Yamhill and Polk counties.

Syringe Service Programs

State Lead: Jude Leahy

Syringe services programs (SSP) are community-based programs for people who inject drugs. SSPs provide a variety of services including free sterile needles and syringes, safe disposal areas, and access to prevention services such as HIV and Hepatitis C testing. These programs are important integrations in our efforts to prevent HIV transmission.

Health Resources & Services Administration (HRSA) Rural Communities Opioid Response Program-Planning Awardees

In funding year 2018, HRSA awarded $25.5 million nationally to over 120 rural organizations to increase access to substance abuse prevention and treatment services serving rural populations across the country.
In funding year 2019, HRSA awarded $24 million nationally to Rural Communities Opioid Response Program (RCORP) Planning projects to implement and sustain SUD/OUD prevention, treatment, and recovery services in rural communities.

In funding year 2020, HRSA awarded a total of $10 million to 50 grantees to strengthen the capacity of multi-sector consortia to develop plans to implement and sustain SUD/OUD prevention, treatment, and recovery services in rural communities.

The agencies below have been awarded HRSA funding.

Heal Safely Campaign

State Lead: Mary Borges

Heal Safely is a campaign to empower people to heal safely after injury or surgery. We believe everyone deserves safe, effective options that will help them rest, recover and get back to daily life.

The counties listed on the map and in Table 2 are the initial counties piloted with the Heal Safely messages.

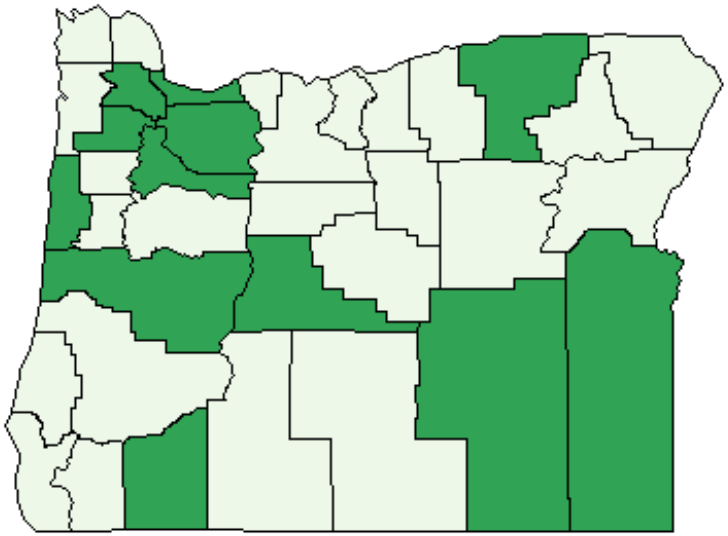

Reverse Overdose Oregon Campaign

State Lead: Mary Borges

Reverse Overdose Oregon is a campaign that gives employers the tools to train their teams on how to use naloxone—the life-saving medication that reverses opioid overdose—as part of workplace safety and preparedness.

The counties listed on the map and in Table 2 are the pilot counties receiving the initial Reverse Overdose Oregon campaign materials.

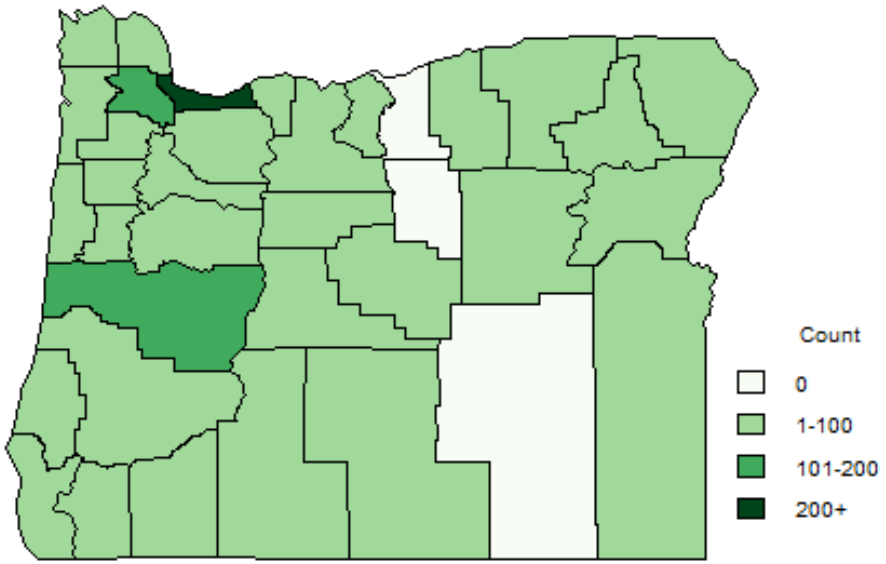

X-Waivered Buprenorphine Practitioners

State Lead: John Mcilveen

An X waiver permits practitioners to prescribe buprenorphine for opioid use disorder patients under the Drug Addiction Treatment Act of 2000 (DATA 2000). SAMHSA handles the application process for practitioners who want to prescribe buprenorphine for opioid addiction treatment.

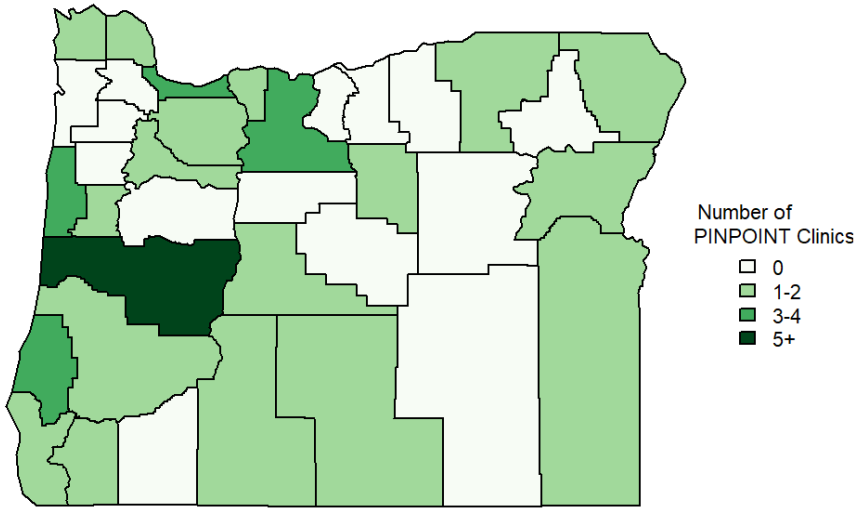

The data outlining the number of x-waivered burprenorphine practioners displayed in this document is pulled from the full DEA list provided to OHA through September 2019, including practitioners that have not opted to display their contact information on SAMHSA buprenorphine practitioner locator.

PINPOINT Clinics

State Lead: Lisa Shields

Oregon Rural Practice-based Research Network (ORPRN), funded under CDC's Overdose Data to Action grant and in collaboration with Synergy Consulting, Comagine Health, and the National Resource Center for Academic Detailing (NARCAD), will be using practice facilitation and academic detailing strategies to improve pain and opioid management in 60 primary care clinics in Oregon. Implementation will occur in 3 waves that will begin in May 2020, August 2020, November 2020, and February 2021

Note: This table is missing agency information for some counties because contact information is still being collected. Information will be added in subsequent versions of this document.

Overdose Detection and Mapping Application Program (ODMAP)

State Lead: Chris Gibson

ODMAP provides near real-time suspected overdose surveillance data across jurisdictions to support public safety and public health efforts to mobilize an immediate response to a sudden increase, or spike in overdose events. It links first responders and relevant record management systems to a mapping tool to track overdoses to stimulate real-time response and strategic analysis across jurisdictions.

Each agency wishing to participate, signs a data sharing agreement which is designed to protect the data within the system. Once signed, they can begin uploading data in real time and access to the ODMAP dashboard, which allows users to view nationwide data. This tool is only available to government (state, local, federal, or tribal) agencies serving the interests of public safety and health. ODMAP is funded by the White House Office of National Drug Control Policy's (ONDCP) High Intensity Drug Trafficking Areas (HIDTA) program and there is no cost to agencies who utilize it.

Peer Recovery Initiated in Medical Establishments + HCV/HIV Testing and Linkage to Care (PRIME+)

State Leads: Samantha Byers, Jude Leahy, and Ann Thomas

The initial Peer Recovery Initiated in Medical Establishments (PRIME) program was funded as a pilot program through House Bill 4143 passed during the state's 2018 legislative session. The pilot peer recovery program, led by the Health System's Division (HSD's) Substance Use Disorder (SUD) Treatment, Recovery, & Prevention Unit, sought to reduce overdoses by placing Peer Recovery Support Specialists in emergency departments to provide harm reduction based peer support, support naloxone access, and link interested participants to SUD treatment. Peer Recovery Support Specialists are people with lived experience with substance use who work with people who use substances in a variety of settings, including medical settings. The legislature designated Multnomah, Marion, Jackson, and Coos as the initial pilot program sites.

In 2019, the State Opioid Response (SOR) funding from the Substance Abuse Mental Health Services Administration (SAMHSA) expanded the successful peer recovery support specialist work to 14 sites in 15 counties. The peer recovery specialist program also expanded beyond the emergency department sites to include primary care, urgent care, and county health department clinics. The 2019 expansion counties included Columbia, Clatsop, Curry, Tillamook, Linn, Lincoln, Klamath, Josephine, Douglas, Lane, Deschutes, Morrow/Grant, Umatilla, Wallowa, Malheur, and Baker. In late 2019, the Centers for Disease Control and Prevention (CDC) issued a one-year grant for state Public Health Viral Hepatitis Programs to develop HCV screening and Linkage to Care intervention models for people who inject drugs in rural counties. The SUD Treatment, Recovery and Prevention Unit, and the Viral Hepatitis Program co-developed the PRIME+ model which integrated infectious disease prevention, screening, and linkage to medical care into existing PRIME peer programs. The aims of the PRIME+ program are to provide peer-based harm reduction support for persons currently using drugs who present to medical settings, including hospitals, emergency departments, urgent and clinical care to 1. Prevent overdose and injection-related infections; 2. Access hepatitis B, HIV, and hepatitis C testing, and other preventive care; and 3. Link interested participants with substance use treatment and primary care. The PRIME+ pilot was implemented in Umatilla, Malheur, and Klamath counties in 2019-2020. All PRIME sites will transition to the PRIME+ model in 2020-2021.

OR-HOPE

State Lead: Ann Thomas and Jude Leahy

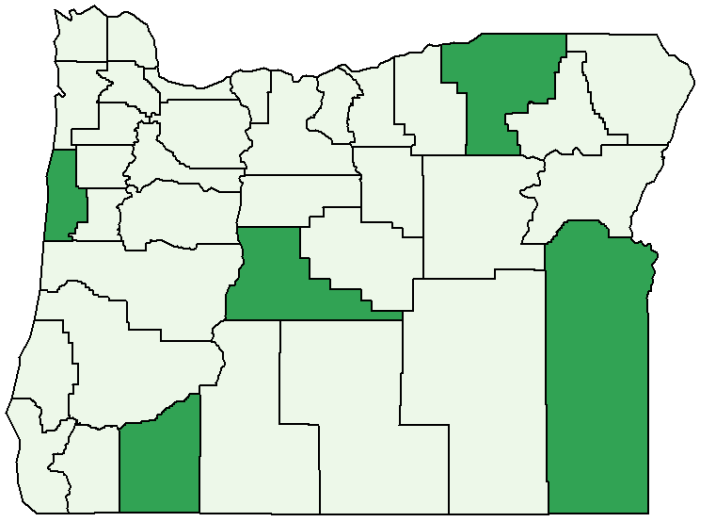

The Oregon HIV/HCV and Opioid Prevention and Engagement (HOPE) study is part of the National Rural Opioids Initiative to address OUD, HCV, and HIV (National Institute on Drug Abuse, 2017). The goal of Oregon HOPE study is to learn about rural drug use in the state, and develop and test a sustainable model for HIV and HCV surveillance and risk reduction for people who use drugs (PWUDs), including intravenous drugs and non-injected opioid and methamphetamine in rural America. The study leverages existing and developing public health and treatment infrastructure to implement a sustainable and a reimbursable certified peer recovery support specialist model. OHA collaborates with Oregon Health and Science University, Comagine Health, AIDS Education Training Center (AETC), HIV Alliance and Bay Area First Step on this project.

Project Nurture (New Project Name to Be Announced)

State Leads: Samantha Byers

Project Nurture is an innovative care model integrating maternity care, substance use treatment, and social service coordination. The model was piloted in three sites in Portland, Oregon beginning in 2015. Project Nurture provided pregnant people with access to peer support specialists, clinical care, and links to social services.

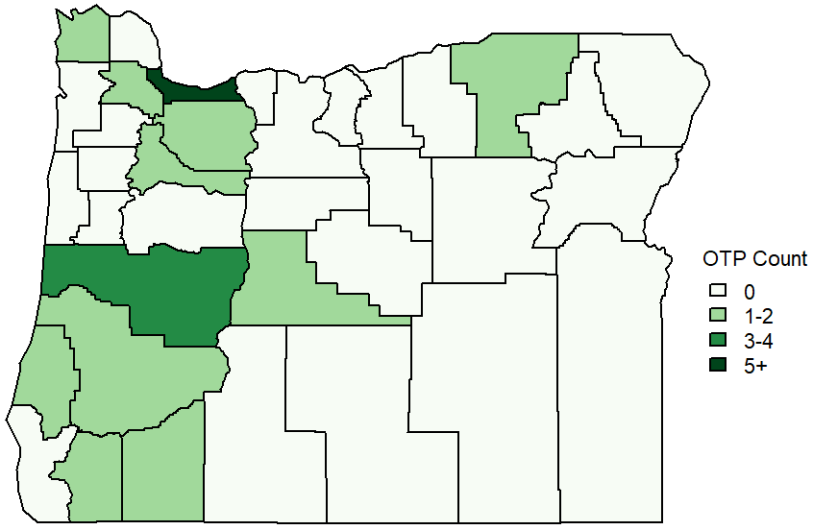

Oregon Health Authority Health Systems Division (OHA HSD) Behavioral Health Services is building on lessons learned from the Project Nurture pilot to expand and adapt this program for sustainable implementation. The expansion project will include six sites across Oregon, with a specific focus on rural areas and sites serving BIPOC families. In addition to geographic expansion, enhanced elements may be incorporated such as a cross-site peer learning collaborative, mental health counseling to address trauma, and the opportunity for recovery peers to receive doula certification. OHA is collaborating with Comagine Health to support sites in incorporating elements of the Project Nurture pilot that best fit the needs of the communities they serve with the available resources. The expansion project will also include a collaboration with Department of Health Services (DHS) Child Welfare in developing training and materials for Child Welfare workers and sites to facilitate coordination related to maternity stays and Plans of Care. The expansion project will be formally evaluated by Oregon Health & Sciences University.

Opioid Treatment Program (OTP)

State Lead: John Mcilveen

OTPs provide medications for opioid use disorders (MOUD) for people diagnosed with an opioid-use disorder. MOUD patients also must receive counseling, which can include different forms of behavioral therapy. SAMHSA's Division of Pharmacologic Therapies (DPT), part of the SAMHSA Center for Substance Abuse Treatment (CSAT), oversees the certification of OTPs. OTPs must be certified by SAMHSA and accredited by an independent, SAMHSA-approved accrediting body to dispense opioid treatment medications. All OTPs also must be licensed by the state in which they operate and must register with the Drug Enforcement Administration (DEA).
