Improving Maternal and Infant Health Outcomes

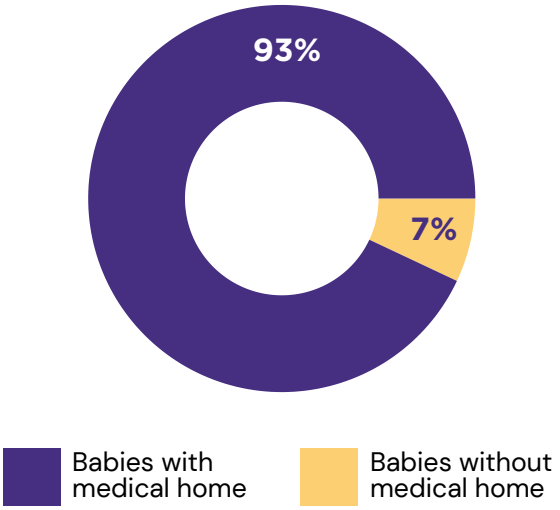

The Southern Nevada Pathways Community HUB (SNPCH), operated by Comagine Health, implemented a one-year maternal health pilot with support from a 2023 SilverSummit Community Reinvestment Grant. Comagine Health contracted with Dignity Health, St. Rose Dominican, a certified Care Coordination Agency, to employ three CHWs to screen and serve pregnant people referred to the SNPCH under the SilverSummit Pilot.

Preterm and Low Birth Weight Rate Improvements

Preterm births and low birth weight rates for our priority populations were significantly lower than the county averages for Hispanic and Black people.

Percentage of Babies with Medical Home Following Delivery

Success Rates Among People Enrolled in Specific Pathways

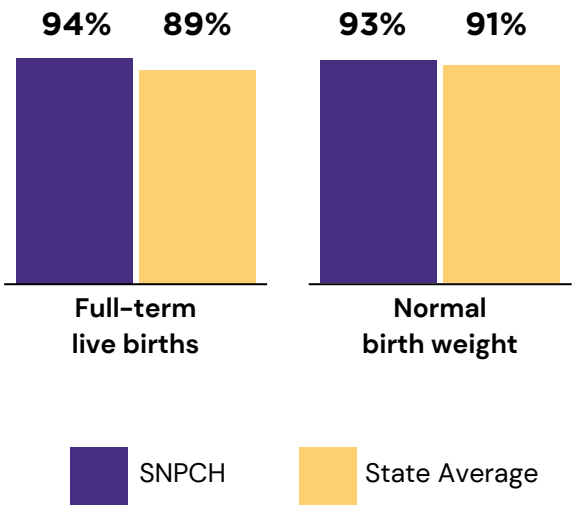

79% established healthcare coverage

81% established a medical home

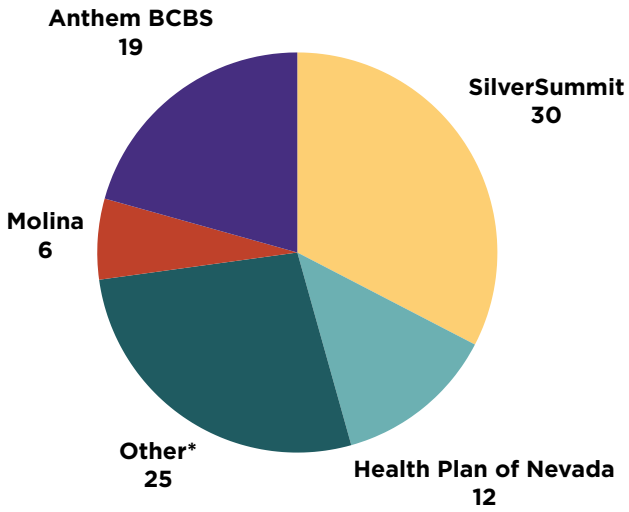

91% had pregnancy outcome improvements

Improvements in three domains (healthcare coverage, establishment of medical homes, and poor pregnancy outcomes) were observed in pregnant individuals after enrolling in the Pathway.

Full-term and Normal Birth Weight Rates

Number of Participants by Health Plan

*Aetna, Medicaid, Sierra Health and Life, Slide Fee Scale Program, Sunrise Sunny Babies, The Culinary Health Fund, Tricare, UMR, United Healthcare, or reported as "Unknown" or "Uninsured"

Additional Data From the Pilot

- **92** people participated in the Pathways pilot.
- Of SilverSummit members enrolled, **80%** were from their "hard to reach" list.
- CHWs used **21** Pathways set by PCHI to screen for and address modifiable risk factors. Pathways are closed when a need is met as defined by a benchmark set by PCHI for all certified HUBs.

> This letter is to express how sincerely grateful I am for the help this program has offered. [My CHW] helped me overcome the difficulties and struggles I was facing. Her compassion has been essential.
