Comagine HEALTH

Improving health and health care. Together.

Washington Community Information Exchange Request for Proposal Interested Parties

Oct. 9, 2026

Interested party name: Be Well Consulting

Contact name: Chris Tugwell

Contact phone number: 425-445-5860

Contact email address: chris@bewellconsulting.org

Summary of capabilities as related to the scope of work: Be Well Consulting is interested in partnering on a Salesforce-based approach to the Washington CIE. We have worked with more than 100 nonprofits and understand the day-to-day needs of community organizations. We also have experience building API connections to HealthierHere's Connect2 exchange. We would welcome the opportunity to explore partnerships where our Salesforce, integration, and nonprofit experience can support the broader solution.

Interested party name: Dimagi

Contact name: Molly Maher

Contact phone number: 248-396-8622

Contact email address: mmaher@dimagi.com

Summary of capabilities as related to the scope of work: Dimagi helps state and local agencies improve care coordination, treatment access, and program outcomes by implementing software. We offer CommCare, an LCAP rapidly configured for web apps used for referrals, case management, and cross-organization collaboration. This could serve as a web platform for the CIE for groups without their own, and for client communications (SMS, email). We also offer data management platform to complement the web app that supports data integration, entity resolution, and reporting, but are open to serving in the capacity of web app only and working with an interoperability partner. CommCare brings proven production implementations at the state level in four states over the past six years, with two additional states in pre-production at this time.

Interested party name: Health Numeric LLC

Contact name: Nevin L. Brittain Sr.

Contact phone number: 517-703-4610

Contact email address: nevin@healthnumeric.com

Summary of capabilities as related to the scope of work: Health Numeric LLC (East Lansing, Michigan) is a U.S.-based health technology and care-support company seeking to join a prime contractor's team as a subcontractor. We can support the WA CIE scope in three areas:

1. Community navigation support, using a hub-and-navigator approach that helps community-based organizations and community health workers screen for health-related social needs with consent, make referrals, and follow up until the loop is closed;
2. A warm-handoff call center for outreach, intake and handoffs between referring organizations, community-based organizations and clinical partners; and
3. Care coordination and remote patient monitoring, linking social-care referrals with ongoing clinical care.

We have experience working under HIPAA business associate agreements and are open to scoped roles under a prime contractor responsible for the core WA CIE platform.

Interested party name: OACRA LLC

Contact name: Abdelah Lomri

Contact phone number: 786-782-5408

Contact email address: providers@oacra.com

Summary of capabilities as related to the scope of work: OACRA LLC provides structured community-resource data, resource research and mapping, verification and reverification, directory/database maintenance, geographic coverage analysis, data normalization, and quality assurance. Our infrastructure is organized around jurisdiction-aware resource discovery and can support a WA CIE implementation as a specialized data, research, verification, QA, or maintenance layer within an existing technology platform. OACRA can also support defined API, data-feed, widget, or licensing requirements where structured community-resource information needs to be integrated into an existing workflow. Our focus is on maintaining accurate, current, and operationally useful resource information rather than replacing the prime contractor’s CIE, case-management, referral, CRM, or interoperability platform.

Interested party name: PathCheck Foundation

Contact name: Mark Shircliffe

Contact phone number: 502-649-9135

Contact email address: mark.shircliffe@pathcheck.org

Summary of capabilities as related to the scope of work: PathCheck Foundation develops privacy-preserving, interoperable digital health infrastructure designed to enable secure,

consent-based information sharing across organizations and systems. Our capabilities include consent and identity management, standards-based health data interoperability, secure information exchange, integration with existing systems, and user-centered approaches that give individuals meaningful control over their information. PathCheck is interested in exploring opportunities to contribute these capabilities as a technology partner, subcontractor, or collaborator on a WA CIE proposal team.

Interested party name: PointClickCare Technologies Inc.

Contact name: Beth Schwartz

Contact phone number: 907-560-3120

Contact email address: Beth.Schwartz@pointclickcare.com

Summary of capabilities as related to the scope of work: PointClickCare is a leading healthcare technology and interoperability partner with extensive experience enabling care coordination, information exchange, and collaborative care across acute, post-acute, ambulatory, payer, and community-based care settings. Through our extensive provider network and established relationships across Washington's healthcare ecosystem, we support the secure exchange of health information and facilitate connected, person-centered care.

Our capabilities relevant to the Washington Community Information Exchange (CIE) initiative include:

- Care Coordination and Shared Care Management through solutions that provide visibility into patient transitions, care team activities, and longitudinal care records across multiple care settings.
- Interoperability and Data Exchange that support the secure sharing of clinical and care coordination information, including real-time event notifications and data exchange between healthcare providers, payers, and community partners.
- Client Record Support through the aggregation and exchange of relevant health information that helps create a more complete view of individuals receiving services across the continuum of care.
- Identity, Consent, and Access Management Support that contributes to secure information sharing, appropriate data access, and trusted exchange among participating organizations.
- Reporting and Analytics capabilities that provide actionable insights, performance measurement, utilization reporting, and population health information to support operational and program objectives.
- Care Team Connectivity that enables providers and care partners to identify, coordinate with, and share information among members of an individual's care team.
- Statewide Healthcare Connectivity through established integrations and relationships with healthcare providers and organizations across Washington, supporting efficient participation in data-sharing initiatives and collaborative care programs.

PointClickCare's role is best aligned as a strategic interoperability and data-sharing partner, contributing trusted healthcare data, care coordination capabilities, analytics, and connectivity

that strengthen the effectiveness of a statewide Community Information Exchange. Through our extensive network and proven expertise in cross-continuum care collaboration, we help organizations improve coordination, support whole-person care, and enhance outcomes for the populations they serve.

Interested party name: Rainbow Health LLC

Contact name: Ayushi Patel

Contact phone number: 832-792-7151

Contact email address: vendor@rainbow.health

Summary of capabilities as related to the scope of work: Rainbow Health LLC is a healthcare technology company providing a coordinated, interoperable platform for care delivery and operational enablement across clinical, behavioral health, community-based, virtual, and home-based settings. Through RainbowCare, Rainbow provides configurable workflows that help organizations coordinate services, manage referrals, support field-based care teams, integrate with existing systems, and monitor program performance. The platform offers web-based and mobile applications to support administrative, clinical, remote, and field-based teams.

Rainbow Health supports organizations across more than 20 states, including EMS and Mobile Integrated Health–Community Paramedicine (MIH-CP) programs, behavioral health organizations, 988 crisis centers, mobile crisis response teams, and community-based care programs.

RainbowCare may complement the WA CIE vision through the following capabilities:

- Care coordination: Configurable workflows that support coordination among care teams, service providers, and community partners.
- Referral management: Referral tracking, follow-up workflows, and coordination with community resources.
- Interoperability: Experience integrating with electronic health records (EHRs), health information exchanges (HIEs), computer-aided dispatch (CAD), electronic patient care reporting (ePCR), and remote patient monitoring (RPM) systems through applicable integration approaches, including APIs, HL7, FHIR, and file-based exchange.
- Assessment and engagement: Configurable screening, assessment, and clinical documentation workflows.
- Community and field-based care: Support for mobile crisis response, community paramedicine, home-based services, and virtual care coordination.
- Reporting and analytics: Operational reporting, program dashboards, and performance monitoring to support service delivery and program oversight.
- Configurable workflows: Flexible technology designed to accommodate different programs, populations, care settings, and organizational requirements.

Rainbow Health welcomes conversations with Comagine Health, prospective WA CIE vendor teams, and participating organizations to explore opportunities in technology implementation,

workflow configuration, interoperability, referral and care coordination, community-based service delivery, reporting, and integration with existing health and social service systems.

Depending on WA CIE requirements and the needs of prospective project teams, Rainbow Health is open to exploring an appropriate role as a technology partner, implementation partner, or subcontractor.

Interested party name: Safety Net Connect, Inc.

Contact name: Jomo Kenneth Starke

Contact phone number: 949-929-3284

Contact email address: jomostarke@safetynetconnect.com

Summary of capabilities as related to the scope of work: Safety Net Connect is a healthcare services and technology company serving safety-net providers, Medicaid programs, and correctional health systems. We run a care coordination platform (Collaborate) and an eConsult platform (Converge) that connects primary care with specialists. In Southern California, Converge has handled more than 306,000 eConsults across four counties with a 1,300-physician network. SNC is HITRUST r2 certified. We are open to teaming on the WA CIE and can bring care coordination and specialty access to a larger solution.

Interested party name: Spatially Health

Contact name: Hillit Meidar-Alfi

Contact phone number: 917-837-0719

Contact email address: hillit@spatially.com

Summary of capabilities as related to the scope of work: Spatially Health is a pro-integrative care platform that turns fragmented health and social care data into prioritized, closed-loop action, working alongside the systems organizations already use.

Care coordination: HRSN, claims and hyperlocal spatial data generate a social risk score and personalized plan for every client, so coordinators work a queue ranked by need, not arrival time.

Closed-loop referrals: clients are matched to the right service and an available contracted provider, and every referral is tracked to a confirmed outcome.

Integration: live, automated pipelines connect to existing systems and return results into them.

Reporting and analytics: live dashboards on response times, completed services and outcomes.

Security and adoption: SOC 2 Type 2, built on Azure Databricks, with zero operational lift for participants.
