Data represented in this table was collected from 4,983 residents of Washington State in the month of June, 2023. It represents respondents from 73.3% of all Washington state ZIP codes.

Information was collected via a survey that asked Washington residents to identify personal and community health concerns as well as provide demographic information. The survey was distributed via paid social media advertisements, delivered in partnership with three community based organizations. The survey was also advertised via QR code at community events held in June. Respondents were offered the chance to win a $25 gift card as part of their participation.

Our thanks to the Martin Luther King *Jr* Family Outreach Center, Southwest Washington Accountable Community of Health (SWACH), and the YMCA of Greater Seattle for their assistance and support in the gathering of this information.

For a dynamic version of this table, please email SQIEvaluation@comagine.org
